TRAINING

Learning with one of MicroCAD's Autodesk Certified Instructors is your first step toward productivity.

By aligning their skills and expertise with the best practices designed by Autodesk, our trainers offer a tailored learning experience that allows clients to design with confidence.

- Classroom Training
- On-site Training
- Web Training
- Custom Classes

CONSULTING

Through CAD/BIM management, development, and other customizable professional services, our consultants are here to help you improve workflows.

Through our industry experience, we assess your needs and provide recommendations to implement the best solution for your team.

- Implementation
- Software Development
- Templates, Libraries and Standards
- Installation & Configuration
- CAD/BIM Design Services
- Manufacturing Automation

PROJECT WORK

MicroCAD provides CAD, BIM and VDC consulting services to the AEC industry for project work.

Our team has extensive experience in BIM and 3D modeling for all related trades. We help with work ranging from small residential renovations to large multi-story commercial coordination management. MicroCAD works with design professionals to expedite timelines and assist with all phases of the design process, including:

- Design Development
- Project Coordination
- Construction Drawings
- Fabrication Drawings
- 3D Renderings
- Drone / Site Scan Services

SUPPORT

MicroCAD's technical support team offers phone, email, web, and remote access support for Autodesk and related applications.

Priority response is available within 4 business hours of support request submission on the following issues:

- Autodesk administrative issues including license management
- Software installation and licensing issues including activation
- Other software usage questions and error messages
