KEY FEATURES

- **Meeting Minutes**
Capture decisions made, assign individuals to action items, and more.
- **Quality Control**
Create and assign issues and track work with checklists.
- **Jobsite Safety Management**
Encourage safety program adoption with inspection checklists and reporting.
- **Submittal Tracking**
Oversee submittal logs across the entire team and easily view statuses.
- **RFI Tracking**
Create RFI's and track progress using customized workflows.
- **Daily Reporting**
Log daily site activity to keep track of project progress and performance.

KEY WORKFLOWS

Construction project management onsite and in the office

BIM 360 Build combines mobile technologies for onsite data collection with cloud-based collaboration and reporting to manage quality, safety, project controls, and commissioning programs.

- Quality checklists and issues
- Safety inspections
- RFI management
- Budget control & Change order
- Asset & Equipment tracking
- Meeting minutes

SEE HOW PEOPLE ARE USING BIM 360

A general contractor with a mission

Unlocking new opportunities in the post-construction phase

Leading the way in construction technology

WHY BIM 360 BUILD?

Rather than working in isolated systems, BIM 360 integrates the entire project workflow from design through construction across one common data platform. Teams can easily transfer information from one phase to the next while housing all project information and data within a single solution.

Centralized Source of Truth

- Unified database with the most up to date information
- Eliminate multiple iterations and rework
- Deeper understanding of project data to help make informed business decisions

Easy Team Handoff

- Fast adoption from one team to the next
- Cloud based connectivity for mobile and desktop
- Accessible historical data

Improved Decision-Making

- Access to the right information at the right time
- All changes reflected in current state of published files
- Involve more stakeholders earlier on in the construction process
